DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on March 17, 2008 has been entered.
2. Applicant's amendment and accompanying remarks filed March 17, 2008 are acknowledged.
3. Examiner acknowledges amended claims 18, 21 and 24.
4. Examiner acknowledges cancelled claims 19-20, 22-23 and 25-27.
5. The rejection of claims 1, 3-8, 10-17 and 25-27 under 35 U.S.C. 112, first paragraph is withdrawn due to applicant's argument.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claims 18 and 24 are rejected under 35 U.S.C. 102(b) as being anticipated by EP 0629512.

The European reference discloses polycyclic condensed compounds with the general structure

It is disclosed on page 5, lines 20-40 that X can be oxygen, sulfur or nitrogen. Also, it is disclosed on page 5 that R₁ to R₅ can be hydrogen or a halogen atom such as bromine or chlorine. R₃ can be placed at the ortho, meta or para position and would read on present claim 18 when a halogen is present at the para position. The reference reads on present claim 24 when X is oxygen and R₁ to R₅ can be hydrogen or a halogen.

8. Claims 1, 3-8, 10-17 and 21 are allowed. The prior art does not provide for the recited light emitting device comprising the polycyclic condensed compounds as represented by formulae (3) and (4). Additionally, the prior art does not provide for the polycyclic condensed compound represented by formula (6).

Response to Arguments

9. Applicant's arguments filed March 17, 2008 have been fully considered but they are not persuasive. Applicant has amended claims 18 and 24 to include at least one of R31, R33, R38 and R40 in formula (5) is a halogen atom and at least one of R59, R61, R64 and R66 in formula (7) is a halogen atom. The European reference discloses

wherein R1-R4 can be alkyl or halogen atom. R3 can be located at the ortho, meta or para position. When R3 is at the para position and represented by a halogen atom, the compounds read on the present claims. The rejection is maintained.
